FROM THE EDITOR

It is with immense pride and excitement that I welcome you to the very first edition of ICE Magazine, launched here at ICE Expo 2025.

This magazine has been a long time in the making, and there's no better place to unveil it than right here – surrounded by the innovation, ambition, and energy that defines our industry. ICE Magazine has been created as a dedicated space to celebrate the people, projects, and progress shaping the future of infrastructure, construction, and engineering.

Inside this launch edition, you'll find thought-provoking features, expert insights, and a spotlight on the standout companies and technologies on show at this year's Expo. Our aim is to not only inform, but to inspire – highlighting both the challenges and the incredible opportunities ahead.

Thank you for joining us on this exciting new chapter. We're just getting started – and I can't wait to see how ICE Magazine grows alongside this dynamic, ever-evolving industry.

Warm regards,

Danielle McSorley

DMC APP DEVELOPMENT

BESPOKE APPS

BENEFITS OF USING A BESPOKE APP

- Tailored to Specific Needs
- Enhanced Efficiency & Productivity
- Competitive Advantage
- Save Time & Money
- Better Security & Data Protection
- Seamless Integrations
- Improved User Experience (UX)
- Reduce Paperwork

BENEFITS OF USING TIP TRACK

- HGV Checklist
- Google Map API Integration
- Quarry/Landfill Docket Handling
- POC/POD Docket Management
- Digital Signatures
- Clock-in System
- Google Cloud Translation API Integrations
- Offline Mode

BENEFITS OF USING TAP A QUOTE

- On The Go Sales Quotes
- Share Equipment Specs, Images in Seconds
- Personalised Admin Dashboards
- Customised Quote Templates
- Realtime Analytics
- PDI and Payment Confirmation
- Admin Product Management & Stock Control

DMC ONLINE PRESENCE

WEBSITE DESIGN

INNOVATION

Surge in Electric Machinery Innovation Sparks Efficiency Revolution Across Sectors

April 2025 – As industries worldwide push for greener, more efficient operations, the electric machinery sector is undergoing a powerful transformation. From advanced electric motors to smart-driven industrial equipment, manufacturers are accelerating innovation to meet growing demand across construction, mining, manufacturing, and infrastructure sectors.

This year's ICE Expo spotlighted groundbreaking electric machinery technologies that promise to redefine performance standards. Notable highlights included ultra-efficient electric excavators, battery-powered compact loaders, and smart grid-integrated machinery systems, all engineered to reduce emissions and improve reliability in high-demand environments.

"Electric machinery is no longer a future concept—it's here, it's viable, and it's outperforming expectations,"

said Sarah Donnelly, Director of Innovation at E-Tech Systems, during a keynote panel.

"The integration of AI, automation, and sustainable power sources has reshaped the landscape, enabling projects to run cleaner, quieter, and cheaper."

One of the standout exhibitors, Voltra Machines, unveiled their next-gen all-electric drivetrain system, designed for heavy-duty applications with near-zero maintenance needs. Meanwhile, GridMotion showcased a modular battery-swapping infrastructure, solving downtime issues and paving the way for longer deployment cycles in field operations. Experts forecast a 35% increase in electric machinery adoption across Europe by 2030, driven by stricter environmental regulations and mounting pressure on firms to cut operational carbon footprints.

Still, challenges remain. High initial investment costs and charging infrastructure gaps are slowing widespread uptake. Yet, with government incentives and R&D momentum, the electric machinery market is expected to reach \$180 billion globally by 2027.

As the sector electrifies, ICE Magazine will continue to spotlight the pioneers reshaping how we power progress—machine by machine.

KELLY TANKS

A Leader in Innovative Concrete Washout and Water Treatment Solutions

As the construction industry continues to expand, so does the need for responsible waste management and environmental stewardship. Kelly Tanks has emerged as a leading player in this landscape, helping to mitigate the environmental impact of construction activities. In providing critical services for managing concrete washout and water treatment, Kelly Tanks demonstrates a commitment to sustainability, compliance, and operational efficiency, and with a forward-thinking approach, they are setting standards for responsible construction practices.

Concrete washout and water treatment management plays a crucial role in mitigating the environmental impact of construction activities. Through effective waste management, innovative recycling practices, and a commitment to sustainability, construction sites are able to help protect ecosystems and promote responsible resource use.

Kelly Tanks product range and customer support is designed to ensure sites are equipped to:

- Comply with regulations
- Minimise waste and environmental impact
- Prevent contamination/pollution
- Promote responsible waste management

Capturing and retaining waste from concrete washout and Hydrodemolition waste before neutralising the pH and recycling the remaining water, Kelly Tanks diverse fleet of washouts are products of choice and best practice across the construction industry. Also boasting a fleet of Water Treatment Systems to include settlement, flocculation, oil/water separation, pH control, chemical treatment, renewable energy, storage tanks and real time monitoring, Kelly Tanks commitment to supplying not only the best products, but the best service has led to more time on site providing assistance, familiarisation training, CPD Courses and Concrete Washout/Water Treatment Toolbox talks.

Onsite is also where Kelly Tanks gain valuable insight and feedback, ensuring they develop their solutions to suit you and your site.

The Path Forward

As regulations surrounding environmental protection become more stringent, the role of concrete washout and water treatment companies will only grow in importance. Kelly Tanks is not just a service provider; they are partners in fostering a sustainable construction industry. By investing in innovative technologies and practices, they contribute to a cleaner, more responsible approach to construction.

GLOBAL NEWS

Image: San Antonio Business Journal

JCB Expands U.S. Operations Amid Tariff Changes

British machinery giant JCB is doubling the size of its new factory in San Antonio, Texas, to 1 million sq ft, in response to newly imposed 10% U.S. tariffs on UK imports. The expansion aims to bolster local production, particularly of Loadall telescopic handlers and aerial access equipment, and is expected to create up to 1,500 jobs.

Machinery Manufacturers Express Concerns Over Tariff Retaliation

Leading manufacturers like Caterpillar, Deere, and Agco have voiced serious concerns regarding potential retaliatory tariffs from international trading partners, which could adversely affect their overseas sales and the broader industry. These companies rely heavily on global exports, and any disruption to trade flows could lead to increased costs, delayed supply chains, and reduced competitiveness abroad. Industry analysts warn that a prolonged trade standoff could force manufacturers to scale back production or re-evaluate international investment strategies, potentially impacting thousands of jobs and stalling innovation in heavy machinery design.

NEWS

SUSTAINABILITY & ELECTRIFICATION

Volvo CE Unveils Zero-Emission Lineup at Bauma 2025

At Bauma 2025, Volvo Construction Equipment made history by presenting its first-ever lineup consisting solely of zero-emission machinery, underscoring the industry's shift towards sustainable solutions.

Oslo Leads with Emission-Free Construction Sites

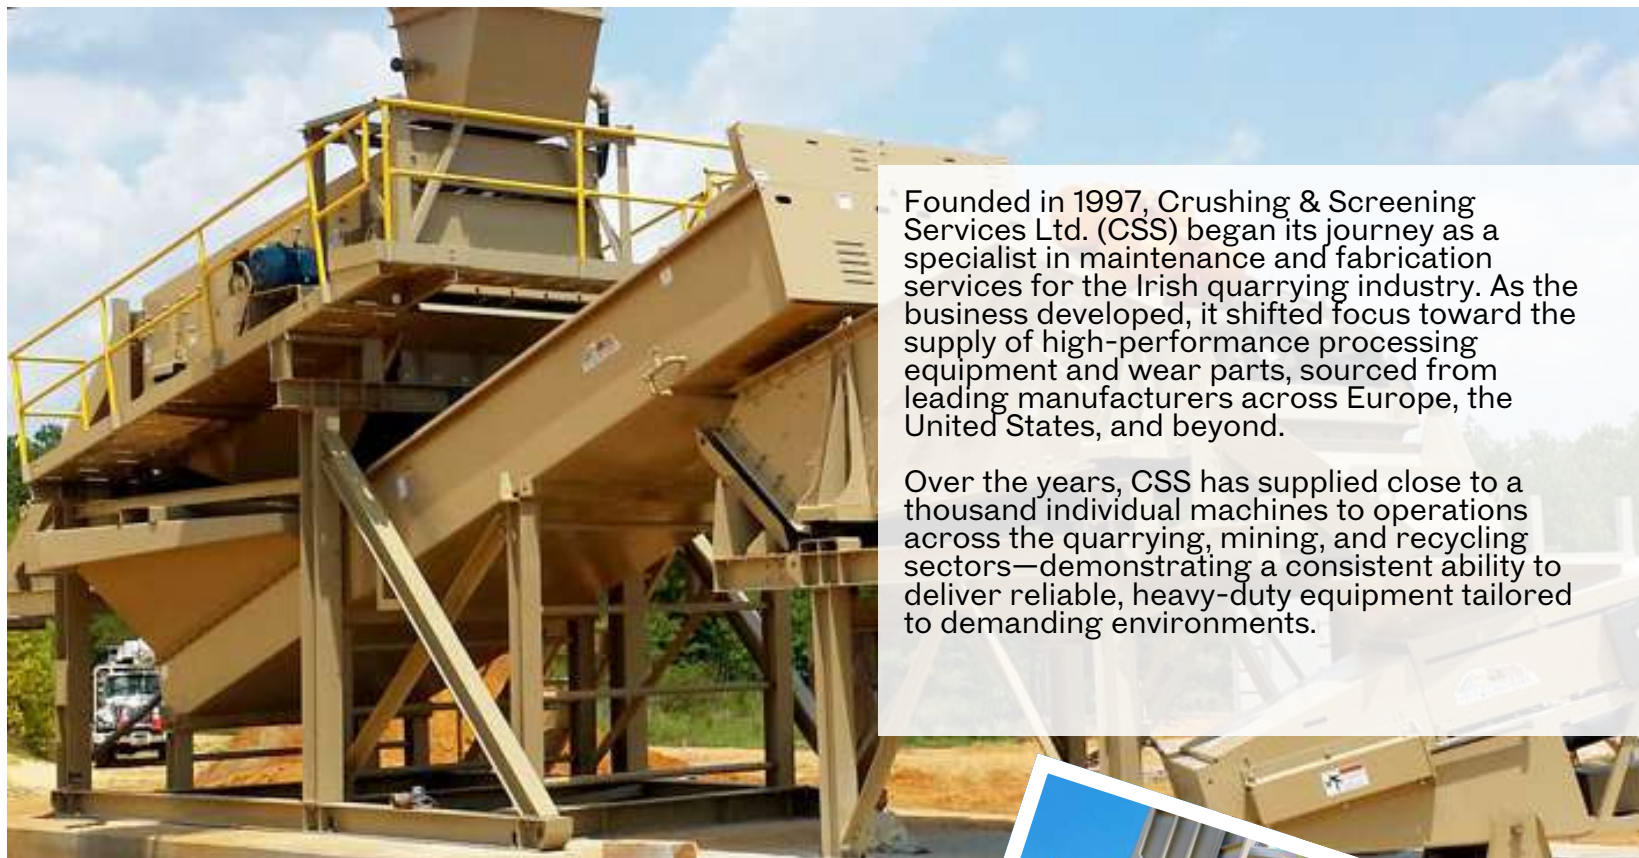

Oslo has become the first city globally to mandate that all municipal construction projects be free from toxic emissions, significantly reducing noise and air pollution. This initiative has spurred manufacturers to develop more efficient electric machinery. This bold move is positioning Oslo as a global leader in sustainable urban development, setting a precedent that other major cities are now considering following.

Ireland's Shift to Electric Plant Machinery

In Ireland, the construction industry is increasingly adopting electric plant machinery, driven by environmental goals, government incentives, and advancements in battery technology. This transition promises reduced emissions, lower operational costs, and improved urban air quality. Contractors are also seeing benefits in reduced noise levels, making electric machinery ideal for work in residential and urban settings. With the government's Climate Action Plan targeting net-zero emissions by 2050, the shift towards electrification is no longer just a trend but a strategic necessity. As more suppliers and hire companies begin to offer electric options, accessibility and affordability are steadily improving, encouraging widespread adoption across projects of all sizes.

Supporting the Quarrying and Material Processing Sector for Over Two Decades

Founded in 1997, Crushing & Screening Services Ltd. (CSS) began its journey as a specialist in maintenance and fabrication services for the Irish quarrying industry. As the business developed, it shifted focus toward the supply of high-performance processing equipment and wear parts, sourced from leading manufacturers across Europe, the United States, and beyond.

Over the years, CSS has supplied close to a thousand individual machines to operations across the quarrying, mining, and recycling sectors—demonstrating a consistent ability to deliver reliable, heavy-duty equipment tailored to demanding environments.

In recent years, the company has strategically incorporated Irish-manufactured products into its range, enabling shorter lead times and tighter quality control. This move has further strengthened CSS's offering, particularly in the area of bespoke washing systems, which are engineered to meet the precise requirements of its domestic customer base.

CSS is now recognised as one of Ireland's largest independent distributors of OEM and aftermarket spare parts for material processing equipment. Many OEM components have been re-engineered in-house to offer extended wear life and enhanced usability, delivering real operational value to their customers.

With a strong reputation for technical expertise and responsive support, CSS continues to be a trusted partner to the Irish quarrying industry. CSS can be contacted at all times on phone or email: (05786) 61333 and info@crushingandscreening.com

New Era for Irish Construction: Eamon McCafferty Launches the Irish Construction Contractors Organisation

A new chapter has begun for the Irish construction industry with the official launch of the Construction Contractors Organisation (CCI), a dynamic new body established to represent, support, and elevate construction contractors across the country.

Founded by Eamon McCafferty, a respected name in the industry with decades of experience, CCI aims to be a strong voice for contractors of all sizes – from small, family-run operations to large commercial developers. The organisation is built on the belief that unity, transparency, and support are the pillars of a strong construction community.

“We are developing CCI to give contractors the recognition and resources they deserve. It’s about putting contractors first, providing practical support, and representing the interests of those on the ground, doing the work,

said McCafferty at the official launch.

CCI promises to offer a wide range of benefits to its members, including:

- Access to trusted service providers
- Industry insights and updates
- Networking opportunities with fellow contractors and suppliers
- Promotion of high standards in safety, compliance, and construction quality
- A strong, united voice in discussions with government and regulatory bodies

The new website, www.constructioncci.ie offers easy sign-up for interested contractors, service providers, and industry partners.

The launch comes at a critical time as the Irish construction sector faces increasing demands, stricter regulations, and the need for skilled labour. With this in mind, McCafferty and his team have designed the CCI platform to be simple, direct, and contractor-focused,

Eamonn McCafferty pictured above

removing red tape and creating a supportive community that encourages growth and professional development.

This initiative reflects McCafferty’s long-standing commitment to advancing the industry and advocating for those who are often underrepresented. Through CCI, he envisions a future where contractors across Ireland are connected, supported, and empowered.

FERRYBRIDGE

Ferrybridge is a family-run agricultural contracting and haulage business based in Ireland, known for delivering reliable, high-quality services across the agri and transport sectors.

DRIVING GROWTH: SEAMUS DOHERTY'S 30-YEAR JOURNEY POWERING TBF THOMPSON TO INDUSTRY LEADERSHIP

TBF Thompson has long been a cornerstone in Ireland's plant and machinery sector, with a history dating back to 1958. Over the decades, the company has expanded its footprint across Ireland, establishing depots in Garvagh, Mallusk, Portadown, and Dublin, and building a reputation for excellence in sales and support of construction and quarry equipment.

A pivotal figure in this growth narrative is Seamus Doherty, who celebrates his 30th anniversary with TBF Thompson this July. Seamus began his journey with the company in 1995, bringing a keen interest in plant and machinery to his initial role. By 2007, he had transitioned to the Plant Sales division, where his customer-focused approach and deep product knowledge led to strong relationships with clients and manufacturers alike. His efforts were instrumental in securing several Dealer Excellence Awards for the company.

In May 2016, Seamus's dedication and leadership were recognised with his appointment as a Director. Under his guidance, TBF Thompson expanded its portfolio by securing the all-Ireland dealership for Hitachi Construction Machinery in 2018, a testament to the company's growing influence and Seamus's strategic vision.

Furthering this trajectory, in October 2020, TBF Thompson joined the McCloskey Global Dealer Network, enhancing its product offerings and solidifying its position in the market. Seamus remarked on this development, emphasising the company's commitment to supplying premium brands and building strong relationships.

Today, as joint Managing Director alongside Alan Espie, Seamus continues to drive TBF Thompson forward. The company's representation of world-class franchises like DAF, Hitachi, Palfinger, Cummins, Thwaites, Montabert, McCloskey, and Bomag speaks to its dedication to quality and customer satisfaction. Seamus's journey from an entry-level position to the helm of the company exemplifies a commitment to excellence and a vision that has propelled TBF Thompson from strength to strength.

FJS PLANT

FJS PLANT EXPANDS FOOTPRINT WITH NEW DEPOT IN NAAS

FJS Plant, one of Ireland's leading names in construction, groundcare, and agricultural machinery, has officially opened the doors to their brand-new State of the Art Depot in Osberstown Business Park, Naas, Co. Kildare.

FJS Plant's brand-new State of the Art Depot in Osberstown Business Park, Naas, Co. Kildare.

This new location marks a major step forward in the company's ongoing expansion and commitment to providing top-tier service and accessibility across Leinster. This new depot will serve as the primary location for all Parts, Sales and Service enquiries.

Known as Ireland's first full-line Kubota dealer, FJS Plant supplies a broad spectrum of Kubota machinery, including construction, agricultural, and groundcare equipment. The company also serves as the main distributor for LiuGong in the Republic of Ireland, offering a trusted range of excavators, wheel loaders, and scissor lifts. FJS are also the main dealers for EvoQuip (a Terex Brand) offering the full range of crushing and screening machinery in Ireland.

FJS have also been appointed as an official Merlo dealer in Ireland, serving the Leinster and Connaught area with the Merlo Agriculture range and Leinster with the Merlo Construction range. Customers will also find a host of other premium brands in their line-up, such as Furukawa FRD rock breakers, Slanetrac, Engcon, Strickland, Geith, and Hand Engineering.

The opening of the Naas depot adds to FJS Plant's growing network, complementing its existing bases in Timahoe, Donadea, Co. Kildare, and Newtown, Bonnettstown, Co. Kilkenny. This strategic addition is designed to better serve customers with faster turnaround times, enhanced support, and increased access to a wide inventory of parts and machinery.

FJS Plant's continued investment in its infrastructure reflects the company's dedication to delivering exceptional products and support to its expanding customer base. The new Naas depot stands as a symbol of FJS's forward-thinking approach and long-standing reputation for reliability in the construction and agri machinery sectors.

Their new dedicated showroom features an array of Kubota products on display, as well as products from brands such as Camsaw, Sealey and Sparex. Make sure to pop in and have a look at their wide range of products available.

More information about FJS Plant and its services is available at www.fjs.ie.

The Giants of the Construction Industry

Ireland's construction sector is not only a cornerstone of the economy—it's an engine of growth, innovation, and national development. From state-of-the-art data centres to vital infrastructure projects and high-end commercial real estate, the country's biggest construction companies are leading the charge, with turnovers in the hundreds of millions—and in some cases, billions.

Here, we take a look at the largest players shaping Ireland's built environment and reveal the financial scale at which they operate.

1. John Sisk & Son Ltd

Estimated Turnover:
€1.5 billion (2023)

Headquarters: Dublin

Notable Projects: Curragh Racecourse redevelopment, Páirc Uí Chaoimh stadium, LinkedIn EMEA HQ

Sisk is Ireland's largest privately-owned construction company, with operations in Ireland, the UK, and Europe. Its projects span commercial, residential, and civil sectors, all executed with a long-standing reputation for quality and innovation.

📌 Reference: [Sisk Group](#)

2. BAM Ireland

Estimated Turnover: €700 million (2023)

Headquarters: Kill, Co. Kildare

Notable Projects: National Children's Hospital, M11 Gorey to Enniscorthy motorway

As the Irish arm of Royal BAM Group, BAM Ireland plays a critical role in the country's civil and building engineering landscape. It has a deep focus on sustainability and digital construction practices.

📌 Reference: [BAM Ireland](#)

3. Mercury Engineering

Estimated Turnover: €1.2 billion (2023)

Headquarters: Dublin

Notable Projects: Facebook Data Centres, Eli Lilly Biotech Campus, Intel Fab plant expansion

Mercury is one of Europe's most advanced engineering contractors, serving high-tech and pharma clients across multiple countries. Their focus on innovation in mission-critical facilities continues to drive rapid growth.

📌 Reference: [Mercury Engineering](#)

BUILDING IRELAND

4. Bennett Construction

Estimated Turnover: €400 million (2023)

Headquarters: Mullingar

Notable Projects: Pembroke Quarter Dublin, Lidl Distribution Centre Newbridge

With more than a century of experience, Bennett Construction is active in Ireland, the UK, and Germany. The company has grown steadily on the back of solid commercial, residential, and retail developments.

♦ Reference: [Bennett Construction](#)

5. PJ Hegarty & Sons

Estimated Turnover: €300 million (2023)

Headquarters: Dublin

Notable Projects: Central Bank of Ireland HQ, UCC Student Hub, ESB Fitzwilliam Street

PJ Hegarty is known for precision and professionalism in large-scale builds. They continue to deliver complex, high-value developments in sectors such as education, healthcare, and finance.

♦ Reference: [PJ Hegarty & Sons](#)

6. JJ Rhatigan & Company

Estimated Turnover: €300 million (2023)

Headquarters: Galway

Notable Projects: TU Dublin Grangegorman Campus, Department of Education schools

JJ Rhatigan has built a reputation for consistent delivery on public and private sector projects, particularly in education, healthcare, and housing. Their projects reflect both modern design and community impact.

♦ Reference: [JJ Rhatigan & Co.](#)

7. Lagan

Estimated Turnover: €150 million+ (2023 projection)

Headquarters: Dublin/Limerick

Lagan is a leading construction and civil engineering company with a strong presence across Ireland and the UK. Known for its expertise in infrastructure, renewable energy, and utilities, Lagan delivers complex, large-scale projects with a focus on innovation, safety, and sustainability. With operations spanning transport, energy, and water sectors, the company continues to play a vital role in shaping critical infrastructure throughout the region.

♦ Reference: [Lagan](#)

Together, these companies represent billions of euros in construction value each year—driving forward the infrastructure, industry, and innovation Ireland needs to thrive. Their influence extends beyond bricks and mortar; they are building the future of Ireland's economy, employment, and communities. As investment continues to flow into housing, tech, and public infrastructure, expect these giants to keep setting the pace for the industry.

AUDREY KILGALLON HAVEN HIRE

Intro & Background

Name & Business – Audrey Kilgallon, HAVEN HIRE

Role – Managing Director

Industry – Plant, Tool & Access hire

Getting Started – Family Business

Inspiration – My Dad, Eamonn

Breaking Barriers

Challenges/Misconceptions – Not anymore, the days of “Can I speak to the man on the desk” is well past us

Support Systems – I’ve pretty much always kept a mentor / coach in the wings especially in latter years

Education & Learning – I’ve studied everything from the basics of computer applications as accounting packages were first introduced to business, Business Development to HR.

Skills & Strengths

Day in the Life – 5:30 wake and in office by 7:30.....everyday is the same but different this Industry which is half the appeal

Favourite Part – Talking & meeting with customers

Women in Construction – I think the role of women has evolved already massively within the wider Construction Community especially in the engineering sector. We would most certainly welcome more female applicants in the hire industry.

Advice for Others – Go for it, always know your worth always

Future Vision – Spending more time travelling incl visiting with my son on Australia. We have a great team in place with plans to grow steadily over next 5 years

Wrap-Up & Real Talk

What Drives You? – Working in an Industry I love

Build Her Shoutout – Emma May, Ardale

MEATH

GALWAY

CORK

RSP

UK AT ICE EXPO IRELAND: Showcasing Innovation and Excellence at Stand 99

RSP UK is delighted to be part of the ICE Expo, Ireland's leading construction and equipment innovation show. As one of the main sponsors of the event, we are proud to highlight our market-leading RSP suction excavators, Amphitec vacuum excavators, and BROCK road sweepers—products that represent the pinnacle of engineering excellence and innovation.

For over 30 years, RSP has been at the forefront of suction excavation technology, expanding our reach to over 30 countries across three continents. This global presence is driven by our commitment to solving industry challenges, improving safety standards, and enhancing efficiency for our customers. Today, RSP operates four advanced production facilities, offering significant production capacity and the flexibility to meet growing global demand. Our dedicated research and development team continues to drive innovation, strengthening our position as the market leader with pioneering solutions such as the all-electric suction excavation solution.

Setting the Standard for Safety

Safety is fundamental to the RSP philosophy. Our cutting-edge solutions are engineered to deliver high-performance suction and vacuum technology, promoting a safer and more efficient way to work. By significantly reducing the need for manual labour, RSP products minimise the risk of injuries and help protect workforces from potential harm.

Adopting RSP solutions also reflects positively on businesses, showcasing their dedication to prioritising safety before undertaking projects. This proactive approach fosters stronger relationships with customers and builds a reputation for reliability and responsibility. Safe excavation practices have become increasingly essential, RSP's products offer unmatched value to businesses looking to elevate their safety standards.

Boosting Productivity with Advanced Technology

Suction and vacuum excavators are more than just tools for safer operations—they are transformative solutions that redefine productivity in excavation work. Compared to traditional excavation methods, RSP equipment ensures projects are completed more efficiently and quickly, enabling tight deadlines to be met without compromising on quality. This acceleration prevents costly delays, allowing businesses to maximise operational success.

Our technology embodies the perfect synergy between safety and speed, creating a competitive edge for businesses across industries. By investing in RSP products, customers gain access to unparalleled reliability and efficiency that sets them apart from their competitors.

Cost-Effective Solutions for Long-Term Success

While suction and vacuum excavators require a higher initial investment compared to traditional methods, their long-term benefits far outweigh the costs. With reduced labour requirements, improved productivity, and fewer expenses associated with conventional digging processes, these machines prove to be an economically solution for businesses.

Additionally, RSP equipment is designed to retain strong residual value when maintained with care and regular maintenance. This ensures a solid return on investment, making RSP products a financially stronger option for businesses seeking premium solutions.

Reducing Risks and Utility Strikes

One of the most common and concerning challenges in excavation is the risk of damaging underground utilities. Such incidents can result in significant costs and project delays, posing challenges for businesses. RSP suction and vacuum excavators mitigate this risk by offering a safer and more precise solution that avoids utility strikes.

By delivering superior accuracy and reliability, RSP products ensure peace of mind for operators, enabling them to focus on completing projects efficiently without the stress of unexpected setbacks.

RSP AT ICE EXPO IRELAND: What To Expect

At ICE Expo, RSP UK will have an impressive display of our premium equipment, offering attendees the chance to see our innovative products in action.

Visitors can view our game-changing ESE 6, equipped with the revolutionary swivel joint feature. Our friendly RSP staff will be available at the parade ring to answer questions, provide detailed insights, and share collateral and merchandise.

Alongside the ESE 6, attendees can explore the Amphitec Vortex, renowned for its exceptional suction power, and the BROCK road sweeper, showcasing efficiency in road cleaning technology.

Join Us at ICE Expo Ireland - Stand 99

In addition to the outdoor displays, RSP UK will be exhibiting at Stand 99 in the Plant and Equipment Pavilion. Here, visitors can connect with our knowledgeable team members, who are ready to support inquiries and discuss how RSP remains at the forefront of the suction excavator industry.

Let us demonstrate how RSP solutions can transform your operations, enhance safety, boost productivity, and reduce risks—all while delivering cost-effective solutions that drive long-term success. We look forward to welcoming you to the RSP stand, showcasing our vehicles in the parade ring, and sharing our passion for innovation, collaboration, and excellence.

WHAT KIND OF EXCAVATOR ARE YOU?

Dig deep into your personality and find out which kind of excavator fits your style on the job site.

1. What's your ideal work environment?

- A-** Somewhere tight and challenging—city jobs rock
- B-** Open fields and big spaces—I need room to move
- C-** A little bit of everything—I like variety
- D-** Tough terrain—I don't mind getting dirty and dealing with extremes

2. What's your work style?

- A-** Precise and calculated—I don't waste a movement
- B-** All-out power—I get stuff done fast
- C-** Adaptive—I adjust to whatever the job throws at me
- D-** Rugged—I'm built for long hauls and heavy-duty action

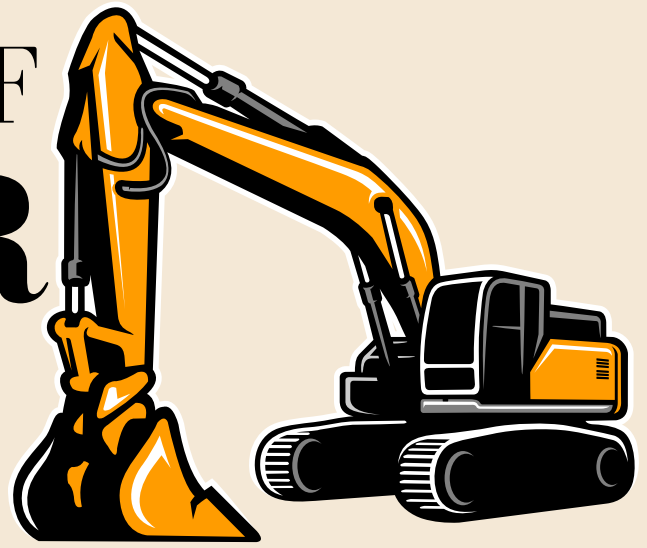

3. What's your go-to lunch on site?

- A-** Protein bar and coffee—fast and efficient
- B-** Big sandwich and an energy drink—I need fuel
- C-** Whatever's around—I'm not picky
- D-** Thermos stew and a strong tea—old school but solid

4. Your crew would describe you as:

- A-** Efficient
- B-** A beast
- C-** Versatile
- D-** Hardcore

WHAT KIND OF EXCAVATOR ARE YOU?

Dig deep into your personality and find out which kind of excavator fits your style on the job site.

5. If you were a tool, what would you be?

- A- Laser level
- B- Jackhammer
- C- Swiss Army knife
- D- Wrench forged in fire

Results:

Mostly A's – Mini Excavator

Compact, nimble, and precise. You get into tight spots and handle the fine details that others can't. Don't underestimate your size—your work speaks volumes.

Mostly B's – Crawler Excavator

You're a powerhouse. Reliable, strong, and ready for big jobs. You like to get things done and leave an impact—literally.

Mostly C's – Wheeled Excavator

You're adaptable and built for multitasking. From the road to the site, you can handle it all. You like to stay on the move and keep things rolling.

Mostly D's – Long Reach Excavator

Tough and resilient, you're designed for the challenging stuff. With your extended range and heavy-duty build, you're not afraid to go the distance.

CONSTRUCTION MACHINERY SALES IN IRELAND

AUCTION TRENDS AND EQUIPMENT STATISTICS FOR 2025

Ireland's construction sector continues to evolve rapidly in 2025, with machinery sales driven not only by increased development but also by the rising popularity of plant and equipment auctions. From excavators to telehandlers, auction houses have become a key distribution channel, providing valuable insights into market demand and machinery trends.

The Role of Auctions in Machinery Sales

With economic pressures and construction costs fluctuating, auctions have emerged as a vital outlet for buying and selling heavy equipment in Ireland. In 2025, companies across the construction, agriculture, and civil engineering sectors are turning to auction houses for flexible, cost-effective machinery solutions.

Euro Auctions has seen record attendance and intense bidding at their live events. Demand has been especially high for large plant such as articulated dump trucks, bulldozers, and 30+ tonne excavators. The appeal lies in the availability of low-hour, late-model machines that offer better value than new units.

Irish Machinery Auctions has also been busy, running monthly events that feature a wide range of lots. Their April 2025 construction auction listed 179 items, while a specialist tool and pedestrian equipment sale featured 358 lots. These consistent volumes underscore the central role auctions now play in the Irish plant market.

3-in-1 for your efficiency: MC-Mobile

Measure, plan and build with one system

Visit us at **Stand 119**

CONSTRUCTION MACHINERY SALES IN IRELAND

Excavators & Earthmoving Equipment

Excavators remain among the most sought-after assets at auctions. In particular, heavy-duty units are seeing strong resale values, as contractors look to upgrade fleets amid a projected increase in infrastructure works and housing developments. The compact excavator market also remains resilient, largely due to urban construction projects requiring agile machinery in tighter spaces.

Wheel Loaders and Backhoe Loaders

Wheel loader sales in 2025 have been heavily influenced by agricultural demand, with nearly 25% of all wheel loader transactions serving farming operations. This crossover between agri and construction markets is a continuing trend. Chinese brands like Everun and Haihong have also gained traction, especially at auctions, offering competitive alternatives to established European makes. Backhoe loader registrations have dropped slightly, as buyers appear to favor more specialized machines for focused tasks. However, well-maintained backhoes still command good prices in live auctions.

Telehandlers & Material Handling Equipment

Telehandlers continue to show strong performance in both sales and auction activity. Brands like JCB, Manitou, and Kramer hold the lion's share of this market. High usage in residential developments and modular construction projects keeps demand steady. In 2024, 549 new telehandlers were registered, with this trend continuing into 2025 as the building industry gears up to deliver 38,000 new homes this year. ([ey.com](https://www.ey.com))

Tractor Sales Reflect Construction-Agriculture Links

Although primarily agricultural, tractor sales also offer insight into construction-adjacent machinery activity. In 2024, new tractor registrations in Ireland fell by 12% to 1,817 units, with larger horsepower ranges proving most popular. Counties like Cork, Tipperary, and Meath led the way in registrations, often reflecting crossover usage in groundworks and drainage operations. ([agriland.ie](https://www.agriland.ie))

Looking Ahead: 2025 and Beyond

The Irish construction sector is forecast to deliver the highest per-capita housing completions in Europe this year. This will continue to drive demand for machinery—particularly for used, auctioned equipment that provides better ROI amid tight budgets and ongoing project timelines.

With auction houses like Euro Auctions and Irish Machinery Auctions offering easy access to varied machinery, 2025 is shaping up to be a landmark year in how plant is bought, sold, and deployed across Irish sites.

VISIT FINLAY AT ICE EXPO 2025 – STAND #13 (OUTDOOR AREA)

This year's ICE Expo holds a special significance for Finlay, and we're thrilled to be exhibiting at Ireland's premier construction plant equipment show. Not only will you find the Finlay team at our expansive **20x20m outdoor booth, #13**, ready to discuss your crushing, screening, and conveying needs, but the event is also being hosted by **Danielle McSorley**, granddaughter of our very own founder, John Finlay. It was John Finlay who, back in 1958, produced Finlay's first mobile screening unit, laying the foundation for the innovative machinery you see today.

On static display at our stand, you'll find the robust **Finlay J-1175 jaw crusher**. This month marks a significant milestone as we kick off the **20th-anniversary celebrations of the J-1175**, with the very first unit built back in 2005. Join us to learn more about this industry-leading machine and its enduring legacy.

Our expert Finlay team will be on hand throughout the show to provide in-depth information and tailored solutions for your specific applications. Whether you're looking to optimise your crushing, achieve precise screening, or streamline your material handling with our conveying equipment, we're here to help.

For peace of mind across the entire island of Ireland, remember that Finlay is proudly supported by our dedicated dealer, **Dungannon Plant Sales**. No matter your location, their skilled engineers are readily available to provide prompt assistance and ensure your Finlay machinery operates at peak performance.

But that's not all! Don't miss the opportunity to witness the power and efficiency of our **Finlay I-140RS impact crusher** in action. We'll be running live demonstrations at the dedicated demo area **three times daily**:

Friday: 10.30 - 10.45AM

1.00-1.15PM

3:30 PM - 3:45 PM

Saturday: 11.15 - 11.30AM

1.20PM - 1.35 PM

3.25 - 3.40PM

In a show where many OEMs are represented by their Irish dealers, take this valuable opportunity to **speaK directly with the people behind the Finlay brand**. Gain firsthand insights into our engineering expertise, product development, and commitment to delivering high-performance solutions.

We look forward to welcoming you to Stand #13 at ICE Expo 2025!

ICE EXPO 2025: CELEBRATING OUR SPONSORS

The ICE Expo 2025 stands as a beacon of innovation and collaboration in the construction and engineering sectors. This year's event is proudly supported by four distinguished sponsors, each bringing unique expertise and commitment to excellence. Let's delve into the contributions of DMC Consultancy, Advanced Waste Recycling, RSP UK, and Palfinger Ireland.

DMC Consultancy: Digital Marketing Consultants

DMC Consultancy is Ireland's fastest-growing, Irish-owned digital marketing agency, proudly headquartered in Dublin. Since our founding by Danielle McSorley in 2018, we've been on a mission to empower individuals and businesses to reach their full digital potential. Specialising in App Development, Website Design, and Social Media Management, we deliver innovative, tailored marketing strategies that drive measurable results—guided by the belief that “Your Success is Our Success.”

dmcconsultancy.com

Advanced Waste Recycling: Commitment to Sustainable Solutions

Since its inception in 2004, Advanced Waste Recycling has been a cornerstone in Ireland's waste management industry. Originating from a simple on-the-spot collection service, the company has evolved into a comprehensive waste solution provider, offering household, commercial, and skip hire services. Their dedication to reliability and environmental sustainability is evident in their operations and community engagements, including sponsorship of local initiatives. Advanced Waste's user-friendly app further exemplifies their commitment to customer convenience and innovation.

RSP UK: Revolutionising Excavation Technology

RSP UK stands at the forefront of excavation technology, specialising in the design and manufacture of suction excavators. Their equipment is engineered to enhance safety and efficiency in complex excavation projects, particularly in urban environments where traditional methods pose challenges. By minimising disruption and maximising precision, RSP UK's solutions are integral to modern infrastructure development and maintenance.

Palfinger Ireland: Leaders in Lifting and Handling

With over 30 years of experience, Palfinger Ireland is synonymous with excellence in lifting and handling solutions. As the market leader, they offer comprehensive services, including sales, design, and installation of lorry loader cranes. Their expertise spans various sectors, including transport, construction, marine, utilities, and timber industries.

Palfinger Ireland's commitment to quality and customer service is further demonstrated through their on-site servicing and extensive range of attachments and spare parts.

palfinger.ie

The ICE Expo 2025 is honored to have the support of these industry leaders. Their contributions not only enhance the expo's offerings but also underscore the importance of collaboration and innovation in driving the construction and engineering sectors forward.

**OFFICIAL SPONSORS
OF ICE EXPO 2025**

DAVE POWER PLANT

For over 30 years, **Dave Power Plant** has been a trusted name in the Irish construction and plant machinery industry, known for reliability, quality service, and deep industry knowledge. This family-run business has built a strong reputation for delivering top of the range construction machinery and aftercare support, making it a go-to provider for plant hire and machinery sales across the Republic of Ireland.

A major highlight in Dave Power Plant's ongoing growth is its **partnership with BOMAG since 2014**, a world leader in compaction technology. Dave Power Plant is proud to be **BOMAG's official partner** for the Republic of Ireland, offering customers direct access to an industry-leading range of rollers, compactors, and paving equipment. This exclusive relationship ensures that clients benefit from the latest innovations, reliable engineering, and unmatched performance - all backed by Dave Power Plant's team of fully-trained experts.

From its base in Cork, Dave Power Plant **offers nationwide coverage**, supplying new and used machinery, expert advice, and comprehensive servicing. Whether you're in the market for BOMAG compaction equipment or need dependable plant hire, you'll find a responsive, knowledgeable team ready to meet your needs.

With a strong legacy and an eye firmly on the future, Dave Power Plant continues to invest in top-tier machinery and long-term relationships. Its collaboration with BOMAG reflects a shared commitment to **quality, durability, and excellence in service**.

Come visit our stand to see our wide range of machinery at the ICE Expo 2025, including the brand new BOMAG BF 350 P-5 Asphalt Paver!
